Welcome

Dear Colleagues,

*It is our pleasure to invite you for participation in the **First International Medical Congress**, organized by the Southeast European Medical Forum, to be held from 22 - 25 September 2010 in Golden Sands Resort, Bulgaria.*

At the Forum you will have the chance to get acquainted with the scientific achievements and practical experience of outstanding specialists in the respective fields, as well as to hold informal meetings and establish contacts. A discussion will also be held on current healthcare issues and health policy in conditions of economic crisis.

The main Congress topics are four:

1. Hypertension and related disorders;

Hypertension is a major health problem in many countries, including Southeastern Europe. The significance of this disease is confirmed by the fact that over 1 billion (about 26% of the elderly) people in the world suffer from hypertension.

2. Oncology;

Progressive morbidity growth is witnessed reaching values of 32 per 1000 of the population, including in the Southeast European countries. By the end of the past millennium one of every four deaths in Europe was due to oncologic diseases.

3. Obesity, Diabetes Mellitus type 2, metabolic syndrome;

Obesity is one of the grave contemporary health problems in the world, including the Southeast European countries. Unhealthy alimentation habits and insufficient physical activity contribute significantly for increasing the incidence of obesity, diabetes type 2 and metabolic syndrome. These diseases are to a large extent due to the alimentation pattern in this part of Europe - low consumption of fruits and vegetables, high intake of fats and salt, high consumption of sugar, etc. Obesity is associated with metabolic syndrome which is a combination of symptoms increasing the risk of cardiovascular diseases and diabetes type 2.

4. Allergy and autoimmune diseases.

The incidence rate of allergic diseases was greatly increased during the last two decades from 20 - 25% previously, to the current 30 - 35% of the population. It is expected that by 2015 every other individual will suffer from some kind of allergy.

About 7% of the population suffer from autoimmune diseases, the total number of which is about 80. Taking into account that allergic and autoimmune diseases are widespread, their duration, the treatment which continues for years on end, the new more efficient medicines and their prices are the reason for the great interest they cause, and for their impact on the health system of each country.

*Two Round Tables will also be held on: 1. **Patient Safety**, which is a major healthcare issue around the Globe. Research shows that in many countries medical errors occur in more than 10% of the inpatient cases. Although WHO, World Alliance for Patient Safety and Joint Commission International are making great effort to facilitate actions of the Member-States in this direction, a lot has yet to be done in the Southeast European countries.*

*The title of the second Round Table, namely: **Health Issues and Health Policies under Conditions of Economic Crisis - European and International Practice**, reveals its*

significance. Such issues are of major importance for the countries in this region due to the insufficient healthcare resources and the need of reforms.

We believe that the combination of the four main Congress topics, as well as the two Round Tables will be exceptionally useful for the physicians from Southeastern Europe. They will have the chance to listen to the presentations of internationally recognized lecturers and will be able to participate in the discussions, to compare achievements and shortcomings, as well as the ways to overcome, avoid or remedy such shortcomings.

The ambition of the organizers is to offer a large-scale scientific event with participants and outstanding speakers from a number of European countries which will guarantee the high scientific level of the Congress and its contribution to the development of the medical science and practice.

The Congress will receive EACCME accreditation.

We extend a cordial invitation for participation to all physicians who would like to be aware of the modern trends in basic medical fields.

CONGRESS VENUE

The Congress will be held at **Golden Sands Resort**.

The **Golden Sands** resort is 18 kilometers north of the city of Varna and near the Golden Sands National Park. It is a magnificent resort, the largest one on the Northern Black Sea coast, with richly wooded hills, white golden beach and clear blue sea. There are lots of famous and ancient mineral water springs, which have a flow of 150 m/sec and were known already to the Thracians and the Roman Caesars. The resort's beach strip is 3,5 km. long and up to 100 m wide. The average air temperature in Summer is 27-30 degrees and the water temperature is 25-28 degrees Centigrade. Golden Sands suits both sun-worshippers and sightseers being close to [Varna](#) - the third largest city in Bulgaria, the pearl of the Bulgarian Black Sea coast with a great number of places of interest. The resort offers opportunities for recreation, entertainment, sport and spa treatment. It has been awarded the prestigious Blue Flag international ecology prize several times.
